

FLOOR TO CEILING GEN2 CUBICLE WALLS

The Gen2 Wall Modular Office Wall System is a flexible architectural wall solution that combines the privacy and appearance of permanent walls with the adaptability of modular office furniture. Ideal for commercial offices, healthcare facilities, education, and government spaces, Gen2 Wall creates private offices, conference rooms, meeting spaces, and collaborative environments without the cost and disruption of traditional construction.

More than a traditional wall system, Gen2 Wall has all the benefits and flexibility of a panel system. Electrical can run at the base, components can hang on the panels, and lower-height workstations can connect seamlessly. The system can extend all the way to the ceiling for maximum privacy or be installed as a freestanding solution. Both sliding and hinged door options are available to fit your space and workflow.

Choose from a wide variety of finishes to complement your office design, including:

- Glass - clear, grey and etched
- Laminate
- Fabric (non-tackable and tackable)
- Metal
- Double pane glass
- Painted glass - white markerboard and custom colors
- Vinyl for healthcare
- Wood veneer for executive offices
- Acrylic
- 3Form
- Custom
