

FLOOR TO CEILING GEN2 CUBICLE WALLS

Gen2 Wall is more than a traditional wall system. It has all the benefits and flexibility of a panel system. This means electrical can run at the base, components can hang on the panels and lower height stations can connect. It's able to go all the way to the ceiling or free stand for extra privacy. Both sliding and hinged doors available.

Finishes include:

- Glass - clear, grey and etched
- Laminate
- Fabric (non-tackable and tackable)
- Metal
- Double pane glass
- Painted glass - white markerboard and custom colors
- Vinyl for healthcare
- Wood veneer for executive offices
- Acrylic
- 3Form
- Custom
