

Pre-Owned Herman Miller Sayl Task Chair

Inspired by the San Francisco landmark of the Golden Gate bridge,

“The notion of using a suspension tower to support an unframed suspension back meant that the elastomer material could be stretched in a way that provides the greatest tension at points where support is needed and the least in areas that would allow for the most expansive range of motion.”

- Herman Miller Website

Adjustments:

- Adjustable Arms (Up/Down)
- Seat Pan Slide (Seat Depth)
- Height
- Tension of Recline
- Recline Lock
- Seat Angle
- Lumbar/PostureFit
