

# WORKSTATION TYPES

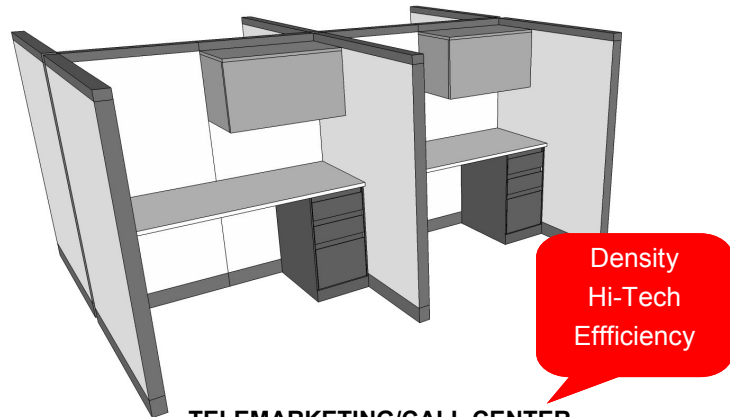

Configurations are available in Used, Refurbished and Blended categories.

**CLASSIC CUBICLE**

5 1/2 to 6 feet tall, **Classic Cubicles** are 6x6 to 8x8. Overhead binder bins and two sets of lower drawers provide generous storage. Tall panels make these cubicles suitable for work that requires concentration.

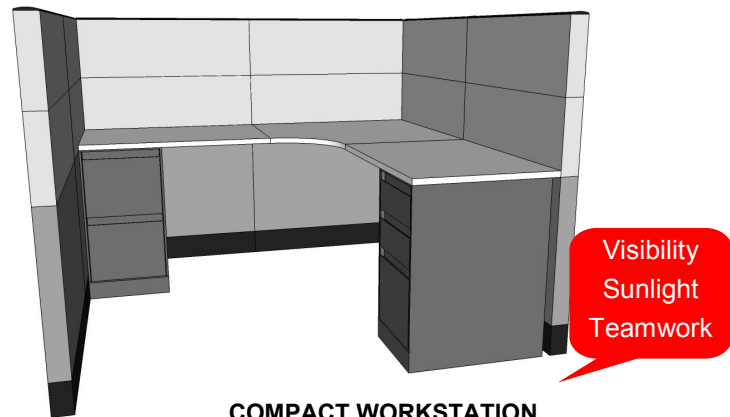

**TELEMARKETING/CALL CENTER**

**Telemarketing or Call Center** stations range from 42" to 72" wide with panels in between each station to reduce noise. Lower drawers can be stationary or mobile, upper head storage is optional. Add-ons like monitor arms support call center work.

**BENCHING STATIONS**

**Benching Stations** are open-style with low panels. Desk tops can be 24" or 30" deep, with lengths from 42" to 72". Drawer cabinets are on wheels, often with a cushion seat top for impromptu meetings. Benching stations are great for staff who need "hotel" or "touch down" work areas.

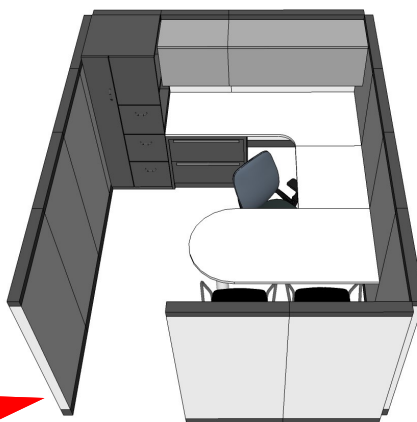

**COMPACT WORKSTATION**

**Compact Workstations** are a space-saving yet comfortable 6x6. The mid-range panel height allows for seated privacy, lower drawer cabinets provide storage. Easily arranged for teams to work together, these stations are the most popular.

## MANAGER STATIONS

At 8x8 and up, **Manager Stations** have room for meeting with staff and clients. Overhead bins, and lateral file cabinets provide abundant storage. Also appropriate for Human Resource,

Accounting and Engineering departments.
